NF CONTREPLAQUÉ EXTÉRIEUR CTB-X

Product certification

> Issued by the FCBA

The mark certifies the performance of plywood panels for external applications and with prolonged exposure to water and weather*.

- ✓ Renovations, including in wet rooms
- ✓ Structures in exposed locations
- ✓ Industrial packaging
- ✓ Nautical constructions...

NF CONTREPLAQUÉ EXTÉRIEUR CTB-X panels offer great adaptability and versatility of application.

In addition, their surface quality makes them suitable for finishes with a wide variety of aesthetics for your projects.

* Choose the correct protection for the plywood application.

> Why choose an
**NF
CONTREPLAQUÉ
EXTÉRIEUR
CTB-X**
panel

An elite certification mark in terms of performance, NF CONTREPLAQUÉ EXTÉRIEUR CTB-X goes beyond the requirements of standard NF EN 636-3, in particular in relation to:

- ✓ the quality of the external surfaces and layers;
- ✓ the quality of the bonding;
- ✓ the biological sustainability of the chosen species;
- ✓ VOC emissions: class E1 formaldehyde emissions, from wood-based panels, compulsory for indoor applications.
- ✓ Plywood panels with a 10-year guarantee.

Continuous control
by a third party

> Guarantee of
consistent quality

The FCBA certification body carries out onsite audits twice a year on the quality of internal controls.

During these audits, samples are taken away for testing at FBCA laboratories.

The results are used to certify the quality of the product and the company's methods of control (in-house laboratories).

NF CONTREPLAQUÉ EXTÉRIEUR CTB-X

The assurance of having:

- ✓ Reliable, versatile panels, with a 10-year guarantee.
- ✓ Products controlled and certified by an independent certification body twice a year.
- ✓ Controlled air quality impacts.
- ✓ A network of responsible, accredited companies.
